Egypt, Cairo, El Mokattam

PROFILE

CS undergraduate with a focused passion for game development, driven by a love for intentional design and continuous learning. I build games that prioritize feel and narrative, and I'm actively growing through every project and community I'm part of. Looking for any opportunity where I can contribute hands-on and grow alongside an experienced team.

EDUCATION

B.sc. Computer Science

Cairo University - FCAI

2025 - Present

GPA: 3.3/4

SKILLS

- C# & Unity
- C++ & Python (intermediate)
- Figma & Adobe XD
- UX/UI Design

CERTIFICATES

- Game Dev Course**
FCAI Game Dev Club · Unity Junior Programmer Covered Unity fundamentals, C# scripting, and OOP game architecture. Culminated in a graded graduation jam judged by industry seniors.
- Game Design Course**
California Institute of the Arts Covered core design principles: MDA framework, player psychology, prototyping, and iterative design.
- UX Design nanodegree**
EgFWD · Top Graduate, 2023 Full UX process: user research, wireframing, prototyping, and high-fidelity Figma design. Graduated top of cohort.

AWARDS

- 2nd Place** — ERAsht, NestoJam 02
- 3rd Place** — NOTICED, FCAI GJ 02
- 4th Place** — Stable Build 02, Nesto Jam 01

EXPERIENCE

Academic team member (Volunteer) 2026

FCAI Game Dev club

- Supported students through content development, work reviews, and hands-on guidance to ensure successful completion of the course.
- Created tips & tricks video resources and stayed ahead of the curriculum through guidance from our community's seniors.

PR Head (Volunteer) 2026

FCAI Game Dev club

- Built industry partnerships with external organizations and professionals to expand the club's network.
- Organized community events bridging student developers with the gaming industry.

Python Tutor (Volunteer) 2023 - 2024 (4 months)

Arabic Whales

- Taught Python fundamentals to beginners; designed lesson plans and delivered one-on-one support from zero.

PROJECTS

Oneiros — FCAI Graduation Project

- Solo-built a dream-exploration game with real-time combat, awareness-based progression, and dynamically evolving environments. Architected all systems independently; ranked 4th by judges.

Stable Build 02 — Nesto Jam · 4th Place

- Co-developed a meta-game where the player builds the game world while competing against a hostile AI. Contributed to core systems programming, original voice-over, and game concept design.

Noticed — FCAI Game Jam · 3rd Place

- Solo-developed a stealth game in 48 hours using dynamic light/dark visibility detection with trigger colliders and raycasting. Delivered a polished, bug-free build with a cohesive narrative under jam constraints.

Kitchen Chaos — Architecture Study

- Implemented a Finite State Machine for cooking logic, C# delegates and Actions for event-driven communication, and ScriptableObjects for scalable recipe data management.

Multiplayer XO — Networking Exploration

- Implemented networked state synchronization and client-server architecture using Unity's Netcode for GameObjects, exploring core challenges of real-time multiplayer systems.

ERAsht — Nesto Jam 02

- Engineered the in-game store system, designed and implemented the main menu, and managed scene flow and transition architecture
